

NIP-TUCK TRAUMA

HEIDI KLUM

After having three kids in just five years, the 34-year-old is still strutting the catwalk for Victoria's Secret lingerie shows, and it's easy to see why. With her long limbs and gorgeous locks, Heidi looks fabulous ... most of the time.

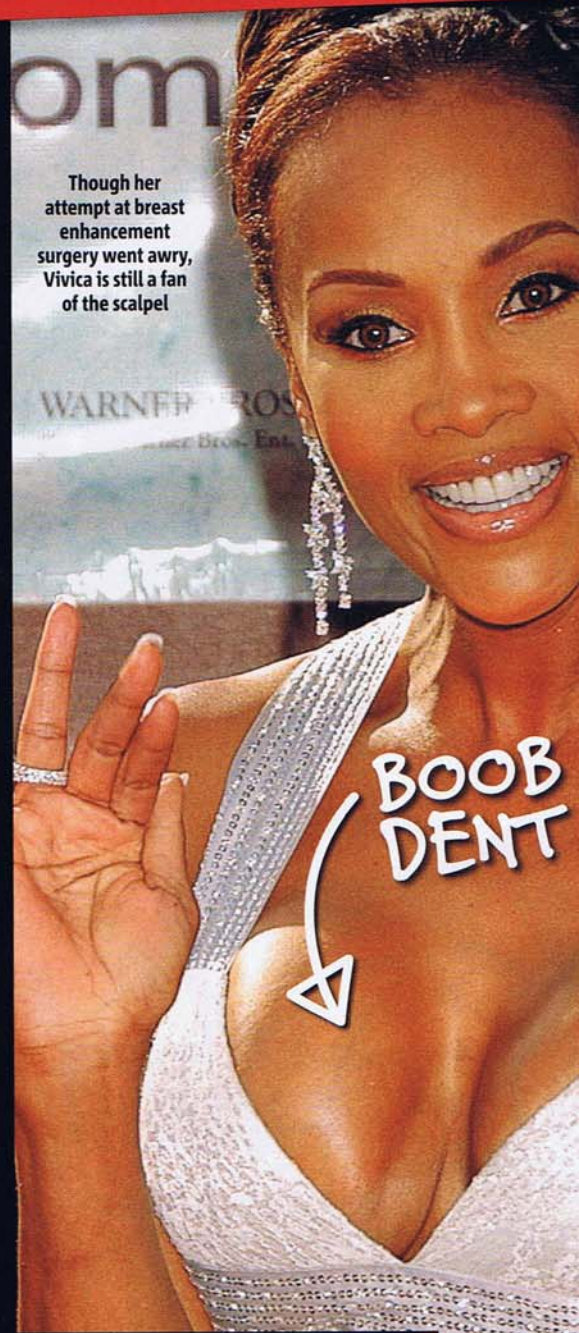

But when the supermodel hit the runway earlier this month for New York Fashion Week, onlookers were surprised to see that her thighs had a bizarre shape to them, suggesting she may have turned to a surgeon to keep her prized pins in top shape.

"The odd dents on Heidi's left leg indicate she may have had liposuction on her inner thighs," says Sydney plastic surgeon Dr Mark Kohout.

The unsightly marks suggest Heidi may have had surgery on her thighs

STRANGE SHAPE!

Though her attempt at breast enhancement surgery went awry, Vivica is still a fan of the scalpel

VIVICA A. FOX

At 43, the *Kill Bill* star is well aware of the pressure to live up to Hollywood's body-image ideals, and she's happy to admit she's gone under the knife to stay youthful.

"I'm in the entertainment business and people like to see you look good," she says. "If there are steps I have to take to look good, I'm going to do it."

And she has - over the years those measures have reportedly included a brow lift, collagen lip injections, a nose job, Botox and a boob job, albeit a botched one.

"Vivica has clearly had a breast augmentation," says Dr Kohout. "This is particularly evident from the odd shape ... The implants appear to have slipped."
