**Spring!**  
Nicole was snapped leaving an LA plastic surgeon's last week, with insiders saying she is planning a post birth tummy tuck

**Hands-on**  
Those close to Nicole say she'd rather be spending time with her family than working out in the gym after having her baby

**HAVE YOUR SAY...**  
What do you think about Nicole having surgery so soon after giving birth? Have your say at [ninemsn.com.au/nw](http://ninemsn.com.au/nw)

# KYLIE'S FROZEN FACE

➔ Kylie Minogue may have "tried them all" when it comes to cosmetic procedures, but some are wondering if the singer has finally taken things too far. Kylie, who turns 41 this week, was so unrecognisable on a recent night out she drew comparison with plastic fantastic US TV personality Joan Rivers.

"Kylie's been a Botox user for a quite a while - her eyebrows and glassy eyes attest to this," says Sydney-based plastic surgeon Dr Mark Kahout. "I think she's also had fillers to the cheeks and lips, and wouldn't be surprised if she's had rhinoplasty."

Of course, having a much younger boyfriend in 31-year-old Spanish model Andres Segura is sure to make Kylie feel some pressure to look more youthful.

"I've tried Botox, I've tried them all," she said recently. "I'm definitely not one of those people who says, 'You shouldn't do this' ... [But] I'm preferring to be a lot more natural these days."
