

BEFORE

MEGAN FOX

→ At just 23, sexy Megan should be the last person to get cosmetic enhancement, but Sydney surgeon Dr Mark Kohout thinks that's exactly what the *Transformers* star has done.

"She's got some Botox and fillers and it makes her look older than her years," he says.

And it's not just her smooth forehead that's, er, raising eyebrows, with her boosted bust causing speculation she's had a boob job.

Says another expert, "The well-defined contour of an implant is apparent. She was probably an A-cup and became a large B."

AFTER

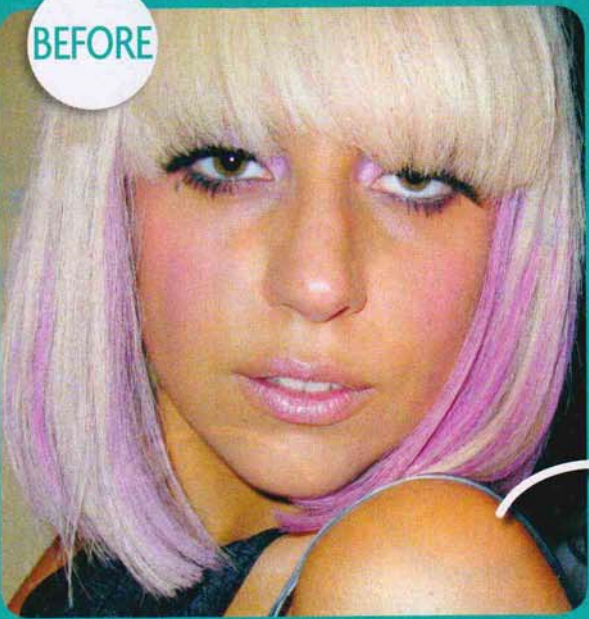

LADY GAGA

→ There's little doubt that Lady GaGa's own mannequin-like mask was probably the inspiration for her hit song *Poker Face*. She's totally transformed from her days as plain Stefani Germanotta.

"It looks as if Lady GaGa has had rhinoplasty as her nose appears smaller and more refined," says Dr Zacharia of the 23-year-old singer, adding that her reshaped nose appears "balanced and natural".

"Her cheeks also look higher and the lower part of the face looks flatter, indicating she may have had a procedure such as liposuction to the jowl area," he says.
